

Rajesh Jethwa

Software Engineer II | Backend & Cloud Engineer (Python, GCP, .Net)

Mumbai, India 📞 +91 9892514167 | ✉️ rajeshjethwa1111@gmail.com | [LinkedIn](#)

SUMMARY

Software Engineer with 5 years of experience in backend system design and cloud-native application development. Expertise in Python (Flask), .NET, and Google Cloud Platform, with proven ability to lead large-scale cloud migration initiatives. Successfully converted Python batch workloads to PySpark for enhanced distributed processing using GCP Dataproc. Currently developing Agentic AI solutions using the ADK framework to optimize backend workflows.

SKILLS

- **Programming Languages:** Python, C#, Java, C, PySpark
- **Backend Development:** Flask, REST APIs, Async Processing
- **AI Systems:** Agentic AI Development using ADK Framework
- **AI Tools:** Hands-on experience with Cursor AI, Claude AI, and GitHub Copilot
- **Cloud Platforms:** GCP (Dataproc, Cloud Run, GCE, GKE, Pub/Sub, BigQuery), AWS, Azure
- **Databases:** MySQL, Couchbase Capella, MongoDB, SQL Server
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Cloud Build, Azure Pipelines
- **Messaging Systems:** Pub/Sub, Amazon SQS, RabbitMQ
- **Other:** UNIX Shell Scripting, YAML, Git

EXPERIENCE

Software Engineer II | RXO Global Services India Private Limited, Mumbai

Nov 2022 – Present

- Led organization-wide cloud migration initiatives, modernizing multiple backend applications by migrating from on-premises infrastructure to Google Cloud Platform using Python and .NET.
- Architected and developed scalable RESTful services using Python (Flask), improving recommendation accuracy from 30% to 60%.
- Accelerated cloud adoption by collaborating with and mentoring multiple teams during cloud migration planning and execution.
- Converted existing Python-based batch processing logic into PySpark to enable distributed batch execution for large data workloads.
- Executed PySpark workloads using GCP Dataproc Serverless and cluster-based jobs for scalable data processing.
- Led end-to-end migration of a production recommendation engine using GCE, Cloud Run, and GKE.
- Delivered a BigQuery integration proof of concept for analytics and reporting.
- Currently developing Agentic AI use cases using the ADK framework to automate decision-making workflows.

Received the Best Operational Project Award for high-impact delivery.

Associate Software Engineer CodeArray Technologies | Mumbai

Jun 2021 – Nov 2022

Backend Development & Multi-Cloud Engineering

Retailgence Project

- Developed backend components for a Python-based analytics platform, supporting data-driven retail intelligence.
- Implemented clustering and assortment optimization algorithms to enhance analytical insights.
- Built Flask-based REST APIs powering dashboards and backend services.
- Created reusable Python utilities for cloud storage operations and backend automation.
- Designed and deployed services across GCP, AWS, and Azure using Docker and Kubernetes.

SME Credit Project

- Contributed to the Cloud team for an AWS-based production architecture.
- Worked with EC2, Elastic Beanstalk (ELB), CloudFront, S3, DocumentDB, SQS, CloudWatch, and Secrets Manager.
- Supported cloud infrastructure deployment, monitoring, and operational stability.

Education

Bachelor of Engineering in Information Technology

May 2021

- Sies Graduate School of Technology, Navi Mumbai | 7.96 CGPA

Higher Secondary Certificate (HSC) in Science

February 2017

- K. J Somaiya College of Science and Commerce | Secured 68.15%
